European Shortages Monitoring Platform (ESMP) Essentials and Industry Reporting Requirements

24 June 2024, 10.00 – 12.30 CEST

WebEx, Live broadcast

The European Shortages Monitoring Platform Essentials and Industry Reporting Requirements Webinar aims to provide an overview of the European Shortages Monitoring Platform (ESMP) and the information that will be reported through it by the Industry once it is operational.

The event will take place on 24 June 2024, 10:00 – 12:30 (CEST) and is aimed at all Marketing Authorisation Holders (MAH) in the EU/EEA.

During this session, the ESMP team will explain EMA shortages management processes at EU level, ESMP milestones and dependencies, and data elements in scope of reporting requirements to the EMA through the ESMP. Additionally, there will be an opportunity to ask questions at the end of the webinar.

As the first go-live of the ESMP approaches in Q4 2024, launching routine shortage reporting for centrally authorised products (CAPs) by MAHs, this webinar is part of a series of events planned throughout the year to promote awareness and knowledge about the platform. The EMA aims to equip marketing authorisation holders with all essential insights and information needed to navigate the platform effectively when it is live.

Please note: the webinar will be recorded and available on this page shortly after the event.

European Shortages Monitoring Platform Essentials and Industry Reporting Requirements

Chaired by *Pedro Pina Ferreira (EMA)*

10:00	Welcome and opening of the session	
	Presentation <i>Pedro Pina Ferreira (EMA)</i>	5'
